About me

Graduate with practical experience in web development, UI/UX design, and graphic design. I enjoy learning new technologies, solving problems, and creating simple, user-friendly digital solutions. I'm a fast learner who can easily adapt to new environments and situations, work well with others, and take on new challenges. I'm looking for an opportunity to apply my skills, gain real-world experience, and grow professionally.

Education

Bachelor of Engineering in Information Technology <i>Chandigarh University, Punjab, India</i>	Completed in 2026 Mohali, Punjab, India
Kumarkhali Govt. College, Kushtia <i>Class 12</i>	Completed in 2022 Kumarkhali, Kushtia, Bangladesh

Experience

IEEE Computer Society Graphic Designer Webmaster	Jan 2023 - Dec 2024
Key responsibilities: - Managed and updated the chapter's website, ensuring timely posting of events and relevant content. - Designed promotional materials (posters, social media graphics) to support events and branding initiatives. - Collaborated with marketing team to deliver visually cohesive and engaging content on a consistent schedule. - Improved site performance and usability while maintaining alignment with IEEE branding and accessibility standards.	
UnceFab Web Developer	2024 - 2025
Key responsibilities: - Assist in updating and maintaining the UnceFab website, ensuring content, product listings, and promotional materials are always up to date and visually appealing. - Collaborate with the design team to implement responsive, mobile-friendly web pages that align with UnceFab's brand aesthetics and user experience goals.	

Projects

BloodGroup Finder - Developed a system to identify and determine blood groups accurately for medical use. - Implemented features to support safe blood donation and emergency blood transfusion management.
Travel Managment system - Developed a system for booking buses, trains, hotels, and flights through a single platform. - Implemented features for reservation management, travel scheduling, and secure payment processing.
Resturent QR Order System - Developed a QR-based ordering system that allows customers to view menus and place orders using their smartphones. - Implemented real-time order management to improve service speed and reduce manual errors.
FaceRecognition - Developed a face recognition system for identifying and verifying users using image processing techniques. - Implemented real-time face detection to improve security and authentication accuracy.
